EDUCATION

University of Michigan

Master of Science in Computer Science & Engineering

Ann Arbor, MI

Yr. 2026 – Yr. 2028

- Relevant Coursework: Adv. Scalable Systems, Natural Language Processing (NLP), Human-AI Interaction (HAI)

Mumbai University

B.E. in Information Technology (Honours in AI & ML), GPA: 3.90/4

Mumbai, India

Yr. 2021 – Yr. 2025

- Relevant Coursework: OOP, Databases, Discrete Maths, Data Structures & Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advanced DSA, Information Retrieval, Image Processing, Web Development

EXPERIENCE

Innovation Architect (Founding Engineer)

June 2025 – July 2026

CreatED

Hybrid, Mumbai

- Joined as the company's first technical hire, leading the technical architecture of internal Learning Management System (LMS) and automation scripts to track student progress, streamline administrative reporting, and eliminate manual bottlenecks
- Architected 'CEDAR AI', a research platform used by 25+ researchers to automate manuscript drafting, and 'Sync', an agentic WhatsApp bot scaling operations across 100+ groups using Baileys & Google Calendar API
- Program Coordinator of CaseQuest with BITSOM Mumbai & IIM Mumbai, orchestrating the full lifecycle including curriculum delivery and logistics for 100+ participants, expanding the scope beyond mentorship to full-scale program management
- *Next.js, Python, LLMs, Agentic Workflows, MERN Stack, Project Management*

Software Development Engineer Intern

Apr 2024 – Feb 2025

LearnMigo

Hybrid, Mumbai/Bangalore

- Developed customizable avatar chatbots enabling teachers to personalize student interactions, designing persona representations that stayed consistent across varied content and teaching styles
- Built LessonAI, an AI tool streamlining creation of learning outcomes, instructional content, and presentations using generative AI

PROJECTS

Countersign – MCP Server for Autonomous Agent Payments

2026

- Built an MCP server enabling an AI agent to autonomously spend money, vetting its spending plan (a priced goal/subgoal/item graph) and every purchase via deterministic rule checks plus LLM-judge checks before authorizing payment through Stripe
- Won the IBM Track and Best Use of Jaclang award at JacHacks 2026 (Univ. of Michigan), the only team among 50 competing to win two tracks
- *Jac, Model Context Protocol (MCP), Stripe API, LLM-as-judge*

Reasoning Canvas

2026

- Built a structured argument canvas for high school researchers using RAG (pgvector) to help students build and defend visual models of scientific claims with supporting/opposing evidence
- *Next.js, TypeScript, FastAPI, Supabase (pgvector), Gemini*

TAQSHA Studios × The Times of India

2026

- Co-launched a partnership between CreatED and The Times of India, designing 4 project-based learning tracks and building the underlying platform; featured on the front page of The Economic Times
- *Next.js, Python, LLMs, Prompt Engineering, Vercel, Render*

E-bike Recommendation Chatbot System

2025

- Built a recommendation chatbot for Joy E-Bike (India's First Listed EV Company) using a weighted scoring algorithm dynamically adjusting suggestions based on preferences like battery life, price, and speed, supplemented with collaborative filtering
- Built an admin analytics panel translating raw interaction data into business-facing KPIs: customer preference trends, location-based interest, and lead conversion effectiveness
- *ReactJS, Tailwind CSS, Node.js, Python, REST API, NLTK, spaCy, WebSocket, Chart.js, D3.js*

TECHNICAL SKILLS

AI & LLM Development: LLM Applications, Prompt Engineering, Agentic Workflows, Structured Outputs, LangChain, ChromaDB, Generative AI

Programming & Engineering: Python, JavaScript, TypeScript, Object-Oriented Programming, SQL, REST APIs

Web & Cloud: React.js, Next.js, Node.js, Firebase, AWS (EC2, S3, Lambda), Cloud APIs, Git/GitHub

ACHIEVEMENTS & COMPETITIONS

Judge, MHacks 2026: Selected to evaluate student hackathon projects at MHacks, University of Michigan

Finalist, Milken-Penn GSE Education Business Plan Competition 2026: CreatED earned a spot as one of seven finalists in Penn GSE and the Milken Family Foundation's 17th annual competition

'Star Student' Award, Information Technology Department: Selected as the department's top-performing student based on a holistic evaluation of academic merit, technical innovation, and leadership in extracurricular initiatives

Finalist, Smart India Hackathon 2022: Led a team to the grand finale by orchestrating the full-stack development of a government documents submission portal; established a transparent verification system for UGC/AICTE approvals
